

Introduction to CSS

HTML is just a skeletal layout of a website. We need CSS to design a website add styles to it and make it look beautiful.

What is CSS?

CSS stand for cascading style sheets.

CSS is optional but it converts an off looking HTML page into a beautiful & responsive website.

Installing VS Code

We will use Microsoft Visual Studio Code as a tool to edit our code. It is very powerful, free and customizable.

Why Learn CSS

CSS is a much demanded skill in the world of web development. If you are successfully able to makes CSS. You can customize your website as per your liking.

Your first line of CSS

Create a css file inside your directory and add it to your HTML. Add the following line to your CSS.

```
body{  
background-color:red;  
}
```

This will make your page background as red.

HTML Refresher

HTML is a bunch of tags used to ray the structure of a page.

Source Code:

```
<!DOCTYPE html>
<html lang="en">

<head>
  <meta charset="UTF-8">
  <meta http-equiv="X-UA-Compatible" content="IE=edge">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <link rel="stylesheet" href="style.css">
  <title>Chapter 0 in instriduction to CSS </title>
</head>

<body>
  Well come to CSS course
</body>

</html>

</html>
```

Style.css

```
body {
  background-color: red;
}
```

Thank You
